1 [Agents, interactions, mobility, and systems \(AIMS\): Agent technology for](#)

[personalized information filtering: the PIA-system](#)

Sahin Albayrak, Stefan Wollny, Nicolas Varone, Andreas Lommatzsch, Dragan Milosevic
March 2005 **Proceedings of the 2005 ACM symposium on Applied computing SAC '05**

Publisher: ACM Press

Full text available: pdf(346.56 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As today the amount of accessible information is overwhelming, the intelligent and personalized filtering of available information is a main challenge. Additionally, there is a growing need for the seamless mobile and multi-modal system usage throughout the whole day to meet the requirements of the modern society ("anytime, anywhere, anyhow"). A personal information agent that is delivering the right information at the right time by accessing, filtering and presenting information in a situation- ...

Keywords: adaptation and learning, agent-based deployed applications, agents and complex systems, evolution, intelligent and personalized filtering, recommendation systems, ubiquitous access

2 [Information integration with attribution support for corporate profiles](#)

Thomas Lee, Melanie Chams, Robert Nado, Michael Siegel, Stuart Madnick

November 1999 **Proceedings of the eighth international conference on Information and knowledge management CIKM '99**

Publisher: ACM Press

Full text available: pdf(845.25 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The proliferation of electronically available data within large organizations as well as publicly available data (e.g. over the World Wide Web) poses challenges for users who wish to efficiently interact with and integrate multiple heterogeneous sources. This paper presents CI3, a corporate information integrator, which applies XML as a tool to facilitate data mediation and integration amongst heterogeneous sources in the context of financial analysts creating corporate ...

Keywords: XML, attribution, data integration, data mediation, metadata

1 [Index structures for selective dissemination of information under the Boolean model](#)

Tak W. Yan, Héctor García-Molina

June 1994 **ACM Transactions on Database Systems (TODS)**, Volume 19 Issue 2

Publisher: ACM Press

Full text available: pdf(2.03 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

The number, size, and user population of bibliographic and full-text document databases are rapidly growing. With a high document arrival rate, it becomes essential for users of such databases to have access to the very latest documents; yet the high document arrival rate also makes it difficult for users to keep themselves updated. It is desirable to allow users to submit profiles, i.e., queries that are constantly evaluated, so that they will be automatically informed of new additions tha ...

2 [Applications: Accelerator design for protein sequence HMM search](#)

Rahul P. Maddimsetty, Jeremy Buhler, Roger D. Chamberlain, Mark A. Franklin, Brandon Harris

June 2006 **Proceedings of the 20th annual international conference on Supercomputing ICS '06**

Publisher: ACM Press

Full text available: pdf(512.26 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Profile Hidden Markov models (HMMs) are a powerful approach to describing biologically significant functional units, or *motifs*, in protein sequences. Entire databases of such models are regularly compared to large collections of proteins to recognize motifs in them. Exponentially increasing rates of genome sequencing have caused both protein and model databases to explode in size, placing an ever-increasing computational burden on users of these systems. Here, we describe an accelerated se ...

Keywords: HMMER, hidden Markov model, protein motif

3 [A distributed control strategy for wireless ATM networks](#)

M. Veeraraghavan, T. F. La Porta, R. Ramjee

August 1995 **Wireless Networks**, Volume 1 Issue 3

Publisher: Kluwer Academic Publishers

SEARCH

Nothing Found

Your search for **+abstract:user +abstract:profile +abstract:database +abstract:monitor** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
